Welcome to/

Pop Issue.

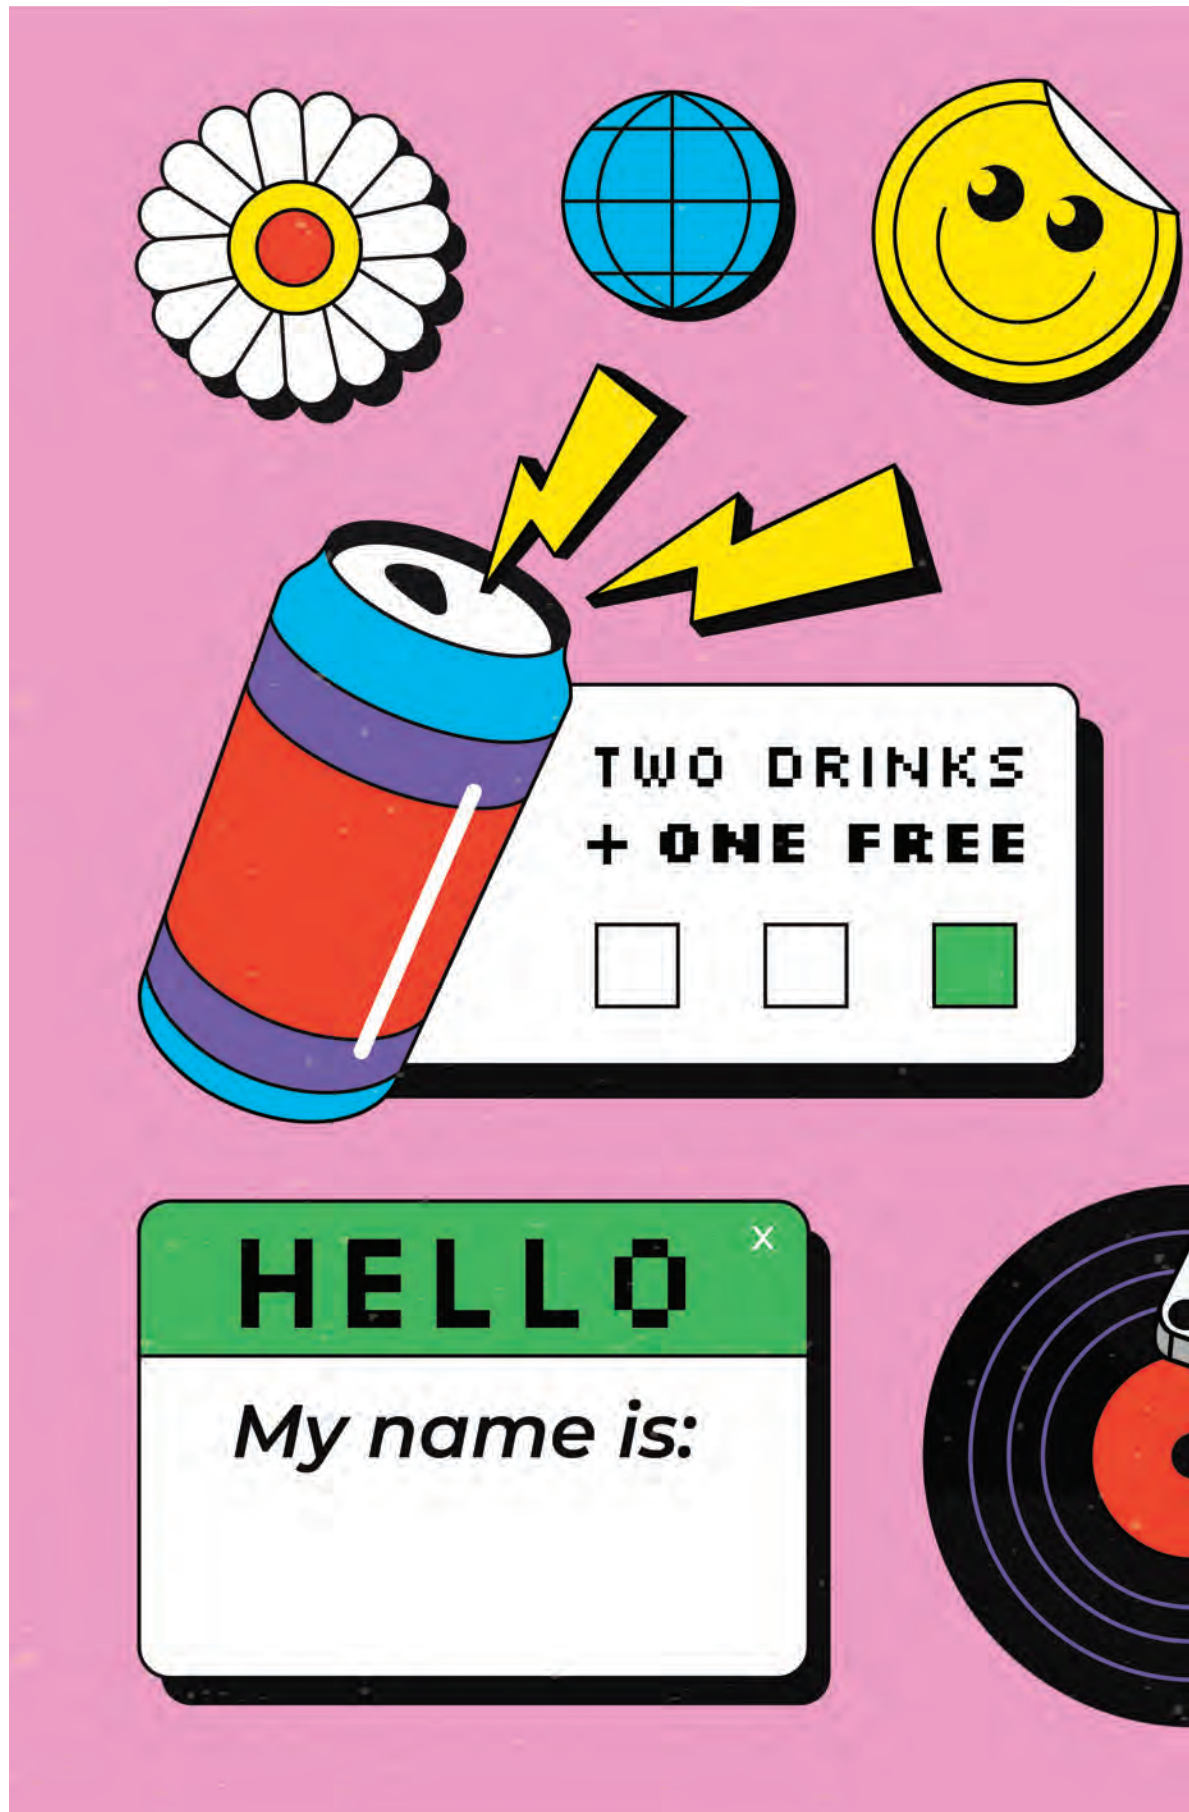

Pop aesthetics are a burst of color without limits, a visual language that turns the everyday into an icon. It's nostalgia for a time when the Spice Girls were a trend and not just a memory. Born from popular culture and urban art, this trend blends the retro with the contemporary, the ironic with the dazzling, and the simple with the extraordinary.

In our selection, we celebrate images that overflow with energy, vibrant contrasts, striking compositions, and a style that never goes unnoticed. From illustrations with psychedelic touches to portraits that bring back the kitsch.

Let yourself be immersed in this gallery of images that champion the power of color, boundless creativity, and the refreshing visual spirit that only pop can offer.

LET'S HAVE A LOOK.

Mercury is the closest planet to the Sun and the smallest one in the entire Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god. Despite being closer to the Sun than Venus, its temperatures aren't as terribly hot as that planet's. Its surface is quite similar to that of Earth's Moon, which means there are a lot of craters and plains. Speaking of craters, many of them were named after artists or authors who made significant contributions to their respective fields. Mercury takes a little more than 88 days to complete its rotation, so try to imagine how long days must be there!

MONSTERS HISTORY.

20xx 20xx 20xx 20xx 20xx

Venus has a nice name and it's the second planet from the Sun.

Saturn is a gas giant. It has rings and it was named after a Roman God.

Neptune is an ice giant and it is the farthest planet from the Sun.

Mars is full of iron oxide dust and despite being red it is a really cold.

Jupiter is a huge gas giant and the biggest planet in the Solar System.

THREE IDEAS.

01 Mercury is the closest planet to the Sun and the smallest one in the Solar System. This planet's name has nothing to do with the liquid metal, since Mercury was named after the Roman messenger god.

02 Venus has a beautiful name, it is very hot and is the second planet in our Solar System. Its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon.

03 Jupiter is a huge gas giant and the biggest planet in the Solar System. It's the fourth-brightest object in the night sky and it has around eighty moons. It was named after the Roman god of the skies.

SIX DIFFERENT IDEAS.

01 Mercury is the smallest planet in the Solar System.

02 Venus is the second planet from the Sun.

04 Jupiter is the biggest planet in the Solar System.

05 Saturn is composed of hydrogen and helium.

Prompt: A tanned elderly man standing with his back to the camera on a bright beach, wearing light blue swim trunks and a white cap. On his sun-worn back, a playful smiley face is drawn in thick white sunscreen, with dripping lines forming a melting smile. The midday sun is intense, casting crisp shadows and highlighting the texture of his skin. The ocean horizon is visible in the background under a saturated cyan sky. The photo has a retro analog aesthetic, with subtle grain, soft halation around highlights, and a humorous, pop-inspired editorial feel.

Prompt: A Dalmatian puppy dog with a small red bow on the head, on a plain white background. The dog's coat is white with black spots and has brown eyes. The bow is made of red fabric and is placed on the dog's head, slightly tilted to one side. The dog is looking directly at the camera with its head slightly tilted, giving it an inquisitive expression. The lighting is soft and even, highlighting the dog's features and the texture of its fur.

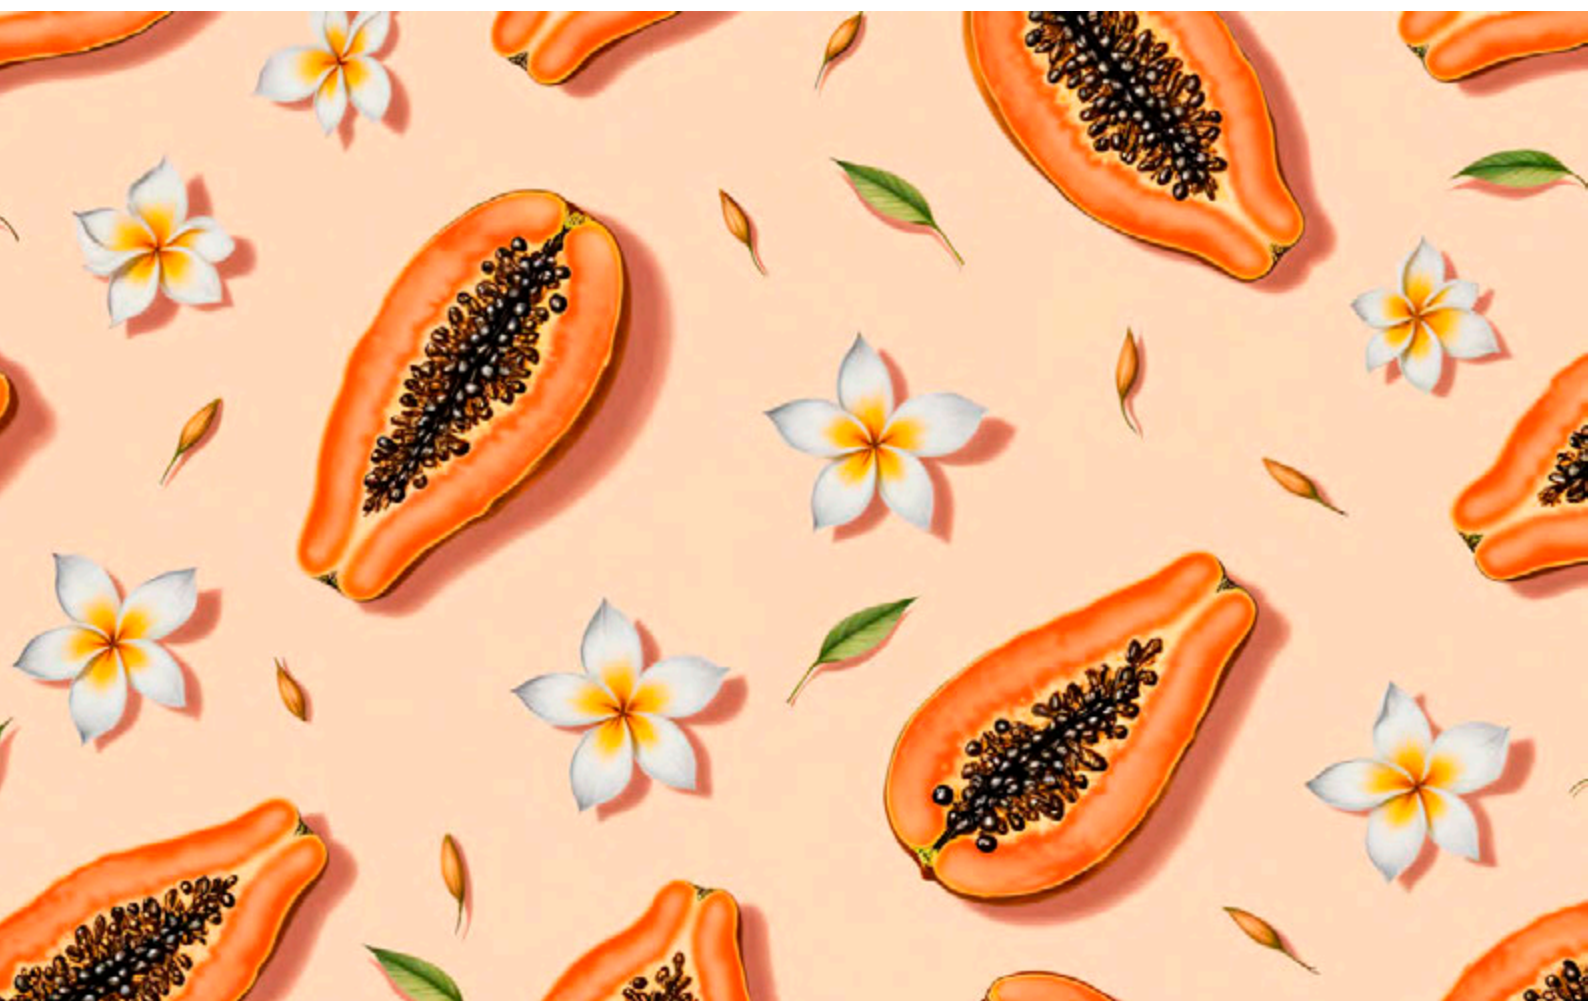

Prompt: A photograph capturing a group of red and white striped beach umbrellas against a soft, vivid blue sky. The umbrellas are arranged at different angles, some partially cropped, creating a dynamic and symmetrical composition. The light is bright and diffuse, evoking a warm, windy summer day by the sea, with a sun-kissed atmosphere.

Prompt: Two women in matching vintage-inspired red swimsuits and white swim caps sitting on the edge of a serene seafront promenade. The escalator is ascending in a sleek, contemporary building with glass railings and reflective metal sides. Each stair step is a different vivid color: red, orange, yellow, green, blue, indigo, and violet, forming a seamless vertical rainbow. Carmen Montes

@cmons.ai

AI has become the bridge between my imagination and reality, turning abstract visions into vivid creations. As I creative, I'm deeply inspired by the rhythms of nature, the richness of culture, and the essence of everyday life. My creations often begin with a feeling—a melody, a breeze, a fleeting memory—that gradually unfolds into a visual narrative shaped by organic forms, vibrant palettes, and symbolic details. Animals, plants, and natural textures are recurring themes in my work, reflecting a deep sense of connection and balance. I'm fascinated by how music shapes visual storytelling—how certain rhythms and tones can translate into color, mood, or composition. Cultural influences guide my process as well, from timeless traditions to pop culture moments that celebrate festivals, rituals, and the beauty of daily life.

Each illustration I create becomes a space where intuition and imagination come together. With AI tools, I explore new ways of blending tradition with innovation—experimenting with movement and stillness, chaos and harmony, light and shadow. I'm especially drawn to dreamlike imagery: expressive animals, abstract nature, or silhouettes of people immersed in layered, surreal landscapes. My goal is to evoke curiosity and emotion through visuals that invite connection, storytelling, and reflection—each piece a visual echo of culture, nature, and design.

Cristina Frías

@cefrias

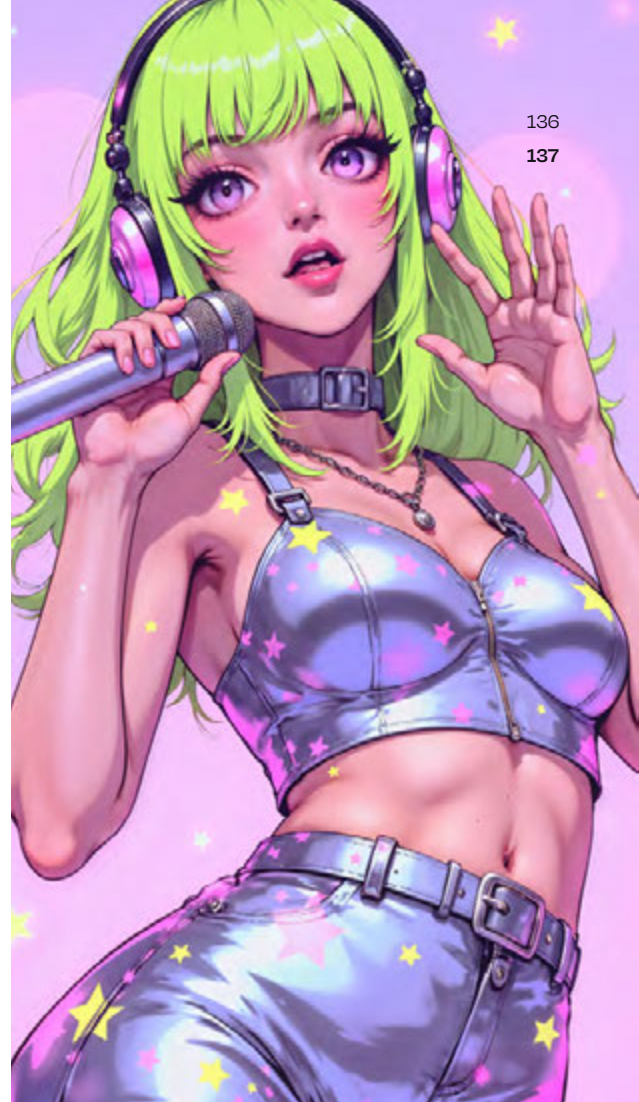

Ever since I was little, I've been fascinated by Japanese culture, anime, and the dreamy worlds of video games. I've always admired the work of concept artists and how they bring to life fantastic worlds that only exist in our imagination. That's why, when I create images with AI, I'm naturally drawn to fantasy (elves, fairies, and all those magical creatures), mixing futuristic elements with medieval fantasy aesthetics.

As a nature and animal lover, I also enjoy including them in my art, always with a cute aesthetic and a joyful touch that melts people's hearts. I'm particularly interested in character design. I always try to give my characters real, expressive emotions so viewers can truly connect with them.

I also try to mimic traditional painting techniques. I prefer a painterly, textured look over something ultra-realistic. AI helps me create those visual effects and pushes me to try styles I might have never dared to try on my own.

What I love most about AI is that it lets me explore ideas quickly, without the fear of getting it 'wrong'. I can test different combinations, styles, and concepts in just minutes, which gives me the freedom to play and experiment. It's not about perfection anymore — it's about enjoying the creative process.

Laura Martín

@lauramm

I've always sought ways to expand the boundaries of imagination and explore new creative territories. Artificial intelligence came into my life not just as a technological tool, but as a deeply inspiring one. What fascinates me the most is its ability to surprise me—generating an image with AI feels like opening a door to the unknown, where each result carries a story I didn't know I wanted to tell.

It's not just about automating or speeding up processes; it's about allowing myself to be guided by the unpredictable. AI inspires me because it confronts me with things I can't control or foresee. And in that encounter with the unexpected, I discover new ideas, fresh visual approaches, and unexplored emotions. It helps me step out of creative autopilot and reconnect with curiosity, with wonder, with that fresh gaze that sometimes gets lost among routines and learned techniques.

Creating with AI doesn't replace my vision or style—on the contrary, it enhances it. It becomes a constant dialogue between the human and the artificial, between who I am and who I can become as an artist. In every generated image, I find not only inspiration, but also an invitation to see art, and myself, from a new perspective.
